

TP 552

Target practice training

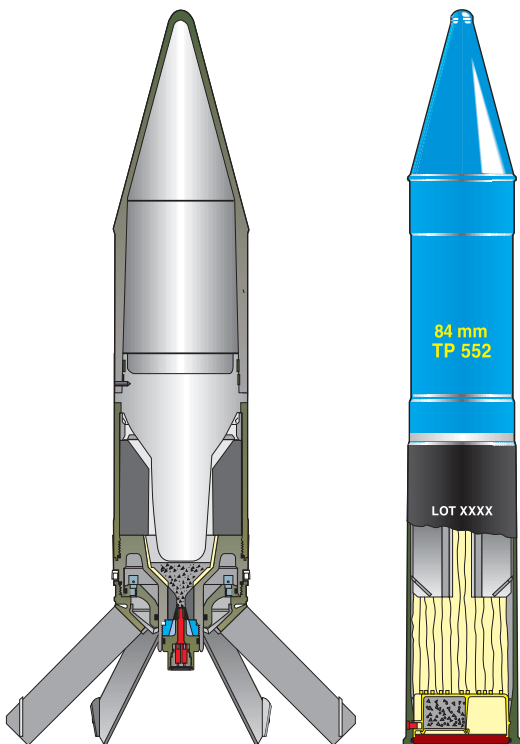

The 84 mm TP 552 round is a target practice projectile that is intended to enhance the capability of the user when in combat.

The inert projectile, which has no fuze system, booster or main charge, carries a rocket motor. This gives realistic training, as well as producing a flat trajectory and short time of flight to target, which, in turn, provides a high hit probability, even at long ranges.

The TP 552 has the same trajectory as the 84 mm HEAT 551. It is also fin-stabilised, and rotates slowly in flight. The main components in the TP 552's cartridge case identically match those used in other types of Carl-Gustaf ammunition.

SAAB

LxWxH. 771x405x272
 Weight 34 kg
 ADR/RID INDG/DGR 1.2C
 FN/UN:0436

Technical Data

84 mm TP 551	
Weight	
complete round	3.2 kg
projectile	2.4 kg
propellant	0.4 kg
rocket motor propellant	0.3 kg
Muzzle velocity	255 m/s
Effective range	700 m
Max velocity	340 m/s
