

AT4 HEAT

Light anti-armour weapon

The AT4 HEAT is a low-trajectory, low-dispersion weapon and each preloaded shell carries an extremely effective shaped charge. And to ensure stability and accuracy the shell is equipped with highly effective stable fins that unfold at the start of trajectory.

It has an effective range of 300 m and carries a warhead with unmatched behind armour effect.

It is this combination that gives the AT4 HEAT its ability to penetrate the armour of modern light armoured vehicles and devastate their interiors.

The AT4's Behind Armour Effect

- Blinding Light
- Intense Heat
- Overpressure
- Massive Internal Damage

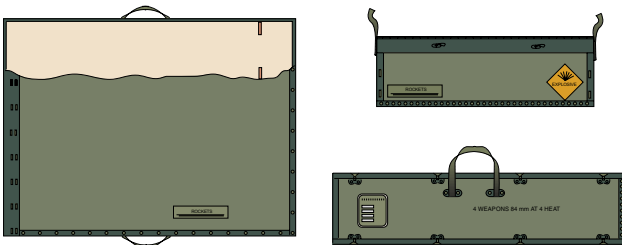

SAAB

The AT4 is the fightingman's weapon – it's easy to use, accurate, extremely effective and available.

The AT4 projectile and launcher cut away model.

Transport box.

LxWxH 1051x791x253

Weight (4 pcs) 45 kg

Unit Load (16 pcs) 195 kg

ADR/RID IMDG/DGR 1.1E

FN/UN: 0181

Technical Data

Calibre	84 mm
Weight	6.7 kg
Length	1 m
Armour penetration	> 420 mm
Muzzle velocity	290 m/s

Unmatchable behind armour effect
