

AT4 CS HP

Light anti-armour weapon

The AT4 CS is an anti-armour weapon that has special internal ballistics, allowing it to be fired from confined spaces; tight jungle, in front of obstacles or even with own troops in close vicinity. It has also a high hit probability out to 300 m. Both these features make it the only anti-armour weapon in the world that can be

used to the full in urban combat. The AT4 CS HP is preloaded with a specially developed HP (high penetration) warhead. This gives the system an armour penetration capability vastly exceeding 500 mm and the ability to defeat most types of armoured targets on the battlefield.

SAAB

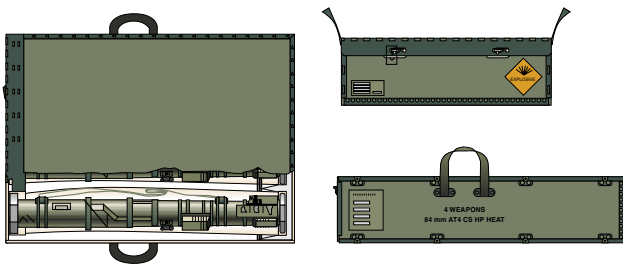

The AT4 CS in jungle warfare.

The AT4 CS fired from confined space.

The AT4 CS projectile and launcher cut away model.

Transport box.

LxWxH 1090x795x250
 Weight (4 pcs) 49 kg
 Unit Load (16 pcs) 210 kg

ADR/RID IMDG/DGR 1.1E
 FN/UN: 0181

Technical Data	
Calibre	84 mm
Weight	7.8 kg
Length	1.04 m
Armour penetration	> 500 mm
Muzzle velocity	220 m/s
